

CRS Data Integration

Today's home buyers need reliable internet information. Now you can find it right in our MLS thanks to a new integration with Fiber Homes and **CRS Data**.

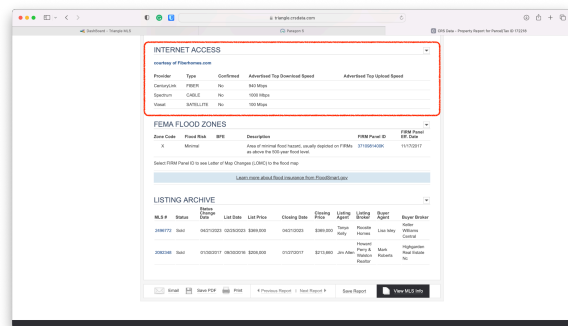

When viewing any listing in the MLS, click on the **CRS Property Report** icon at the top of the report.

Then select **CRS Property Report**.

Scroll down to the **Internet Access** Section to view the provided internet availability data available on the property.

Sign up to access additional resources in the Agent Pro Portal at FiberHomes.com.

This gives you access to free marketing materials for select listings.

It's fast. It's easy. It's free. And your clients will thank you.
